Above Ground 2017
Installation Price from Local Contractors

Installation: Includes leveling, installation of the base blocks, sand bottom, pool frame, pool wall, liner, skimmer, top rail, top caps, pump, filter, and plumbing.
*Pool cove is highly recommended for a more uniform look and liner durability.

Excavation: Our prices **do not include** excavating, as each job site is different. If you choose to do the excavating yourself or have someone else do the excavating for you, our specifications must be followed. Excavation is available through local contractors and must be quoted on site.

Materials: Includes washed masonry sand for pool bottom, 4" x 8" base blocks for each upright/wall joint, and a 3' x 3' pump and filter base block.

Water: We can make the arrangements at the time of installation for water delivery, unless you choose to do this yourself. Water is an extra charge not included in the installation price. Truck delivery is recommended. (Please ask for the current price of water and water delivery). There is no preference on who hauls the water as long as it is there when needed.

THESE PRICES DO NOT INCLUDE EXCAVATION OR WATER FOR POOL
