

The Damaging Truth About Salt Systems

And Why You Should
Take a Look at

 Fresh
Mineral Water
Easy™

It's time to clear up the saltwater pool myth

You're not buying a natural ocean water experience. You're buying a mini-chlorine factory. It's time to learn about a cleaner, clearer, softer alternative.

WHAT IS A SALT SYSTEM?

It's an unregulated device that's actually a salt chlorine generator (also known as a salt cell) that uses electrolysis to break down salt and produce chlorine. Sound expensive? It is. You pay a lot to install it. And because salt is so corrosive, you'll be replacing all kinds of parts and equipment prematurely. So you keep on paying.

SALT CHLORINE GENERATOR SYSTEM

SALT EATS THROUGH METAL AND STONE

It destroys screws, handrails, patio furniture, pool lights, landscaping,...you get the idea.

SALT CORRODES EXPENSIVE EQUIPMENT

You'll be prematurely replacing heaters, automatic pool covers – even those pricey salt cells themselves. Pool equipment makers won't warranty damage caused by salt generators. Guess who pays.

MORE MAINTENANCE THAN YOU MAY THINK

You'll be constantly monitoring and adjusting pH levels (with acid). Salt cells need regular cleaning (more acid). So you're messing with chemicals instead of relaxing.

SALT SYSTEMS ARE EXPENSIVE

They cost a lot to install. And every 2-3 years you'll need to spend a lot more replacing the salt cell. They cost hundreds.

WHAT IS FRESH MINERAL WATER EASY?

It's cleaner, clearer, softer water. No costly corrosion issues here. Fresh Mineral Water kills bacteria with far less chlorine. Half the chlorine of salt pools. So your swimwear colors won't fade – or smell. And you won't spend time measuring or touching chemicals.

FRESH MINERAL WATER

EASY ON METAL AND STONE

No Frog product has caused any damage whatsoever. Not even a stained pool liner.

EASY ON EQUIPMENT

Protect your pool investment. Fresh Mineral Water isn't harsh or corrosive so you won't be prematurely replacing anything.

EASY TO MAINTAIN

No measuring, constant monitoring or even touching chemicals. Lightweight pacs and cartridges are pre-filled. And recyclable! You'll spend more time having fun with family and friends.

EASY ON THE POCKET BOOK

Reasonably priced with long lasting replacement cartridges.
