SANITIZERS

Sanitizers have a long-lasting stabilized sanitizing action that rapidly destroys most bacteria and algae.

GRANULAR

Sodium Dichloro Stabilized Chlorinating Granules are 55% available chlorine in a complete and fast-dissolving granular formula. May be added directly to pool water. Use required amounts to maintain 1.0 - 1.5 ppm free active chlorine residual. Also can be used as a shock treatment to kill algae.

SAFETY VACUUM RELEASE SYSTEMS

VAC ALERT

The perfect safety solution for every pump that draws water in pools, spas, fountains, slides and vacuum ports. Self-monitoring, non-electrical and low maintenance. Easy to install within thirty minutes. Long-lasting design features, moisture resistant PVC, and stainless steel construction. Includes a 3-year limited warranty that ensures reliability. Won't damage your pump when tripped.

HAYWARD STRATUM

The Hayward Stratum VRS is the only SVRS to both vent the pump suction line to atmosphere and turn off the power to the pump motor. Automatic restart in "protection mode" eliminates the nuisance of tripping. Complete internal system check. Directly monitors and reacts to changes in suction outlet systems. Meets or exceeds all relevant ASME/ANSI performance standards. Installs in as little as

STINGL SR-500 SWITCH

The Model SR-500 is a Safety Vacuum Release System (SVRS) that works monitoring the vacuum on the suction side of the pool or spa pump. When a blockage occurs in the main drain or skimmer, a sudden rise in vacuum will cause the SR-500 to shut down pump operation and activate an audible alarm. The pump will remain off with the alarm sounding until manually reset.

PENTAIR INTELLIFLO VS SVRS PUMP

Pentair's new IntelliFlo pump is designed with safety first. The pump will automatically shut off when a suction block is detected with its magnet motor technology. Expect electrical savings of over 30% compared to a single speed induction motor.

CARDINAL INGROUND POOLS

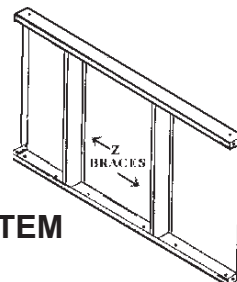

AMERICAN-MADE "ZAM" COATED STEEL POOL KITS

"ZAM" stands for Zinc, Aluminum, and Magnesium.

The ZAM coating is a new anti-corrosion technology that is revolutionizing the steel coating industry. ZAM coating far exceeded the performance of the standard G235 Zinc coating. The top and bottom flanges are "TOGGLELOCK," a no-weld joining process to create a rigid, unitized panel.

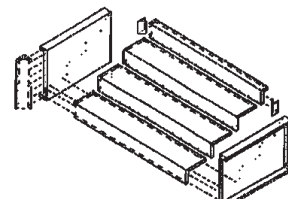

Bracing is made up of precision bent, predrilled components. All "A" frame components consist of 11 gauge steel. Turnbuckle "A" frame or threaded rod combinations are available. Light, return, and skimmer panels are totally prepunched for accuracy as well as convenience. Panels come with a lifetime warranty.

ABOVE GROUND LINERS

GLI ABOVE GROUND LINER SHIELD

Rocks, stones, grass, and other objects in the ground below a pool can easily puncture unprotected pool liners and cause leaks. This is an out of the box pre-cut revolutionary bottom system that will virtually eliminate pool liner problems.
